66-400 Gorzów Wlkp.  
POLAND

October 19th 2012

To whom it may concern

SIETAR Deutschland e.V. organizes "SIETAR Forum" every two years. SIETAR Forum 2012+38 "Global Integral Competence" took place in ICD House for Culture and Art in Berlin from September 27th to 29th 2012. This year's Forum was most visited - more than 230 participants - and very international. The participants came from Germany, UK, France, Spain, Italy, Poland, USA, Canada, Brazil, Netherlands, Belgien, Luxemburg, Russia, Bulgaria, Switzerland, Austria, Kazakistan, Israel and Japan.

The organization team has began with their work in December 2012, which was very late indeed. The team director believed strongly that Conrego registration and content management system can help not only for registration, but also for preparation of the congress because he heard and experienced Conrego-system already in SIETAR Europe congress in Krakow in 2011. And many members of SIETAR Europe recommended him Conrego system.

The congress website which was developed and designed by Conrego has been launched in January 2012 and the registration system has worked perfectly. In March 2012 the "call for workshop proposal" system ran and worked smoothly and efficient, so that the organization team worked very relaxed and not under the time pressure.

The most special appreciated function of Conrego is "Communication" with which we could communicate with all participants by Newsletter before and after the congress. Many participants have amazed this function and thanked because they got important informations about the congress quickly and timely.

As mentioned above, there were many participants from many counties with diverse tax systems. With Conrego system the workload of the account manager was reduced dramatically and spared much money.

The content management system was very easy to operate and we changed and modified the congress website without any help. Off course we had some questions and troubles sometimes, the staff of Conrego was ready to help us almost around 24 hours.

We recommend Conrego system strongly to those whom will organize big conferences with complicated registrations.

Best regards

Dr. Kazuma Matoba  
SIETAR Deutschland e. V.
